Product preferences by age group

100 = average customer; blue = buys more than average, red = less.

product_group_name	<25	25-34	35-44	45-54	55+
Shoes	85.16	111.79	112.56	86.72	102.63
Garment Full body	84.30	104.12	108.10	101.58	110.29
Garment Lower body	93.29	97.48	105.90	106.83	105.25
Bags	139.28	89.61	88.53	90.89	78.46
Nightwear	79.36	104.87	116.59	105.72	98.83
Swimwear	134.20	104.34	80.96	86.14	55.22
Underwear	118.41	106.76	96.25	87.00	62.16
Garment Upper body	96.76	96.95	97.79	103.22	114.38
Accessories	120.99	97.51	95.01	89.09	85.31
Socks & Tights	93.24	105.35	106.07	101.48	84.47

Key takeaways

- Ladieswear brings in about two-thirds of revenue, with Divided is a far second.
- Customers mostly buy basics: solid patterns are about 58% of revenue and black alone about 35%.
- Age groups mostly buy the same things. The differences are:
  - Under-25s buy more bags, swimwear and accessories than average (index about 120–140).
  - 55+ lean toward full-body and upper-body garments, and buy far less swimwear and underwear.

Which product types are seeing an upward trend?

Product types with growing share of revenue and units sold in the recent months compared to the same months last year (Jun–Aug 2020 vs. Jun–Aug 2019)

Hair/alice band	26.8%	39.7%	15.11%	22.40%	143.90	14196	Genuine growth
Earring	23.9%	34.2%	12.49%	17.61%	291.87	26236	Genuine growth
Jacket	20.0%	13.1%	8.94%	-0.87%	2,796.63	46126	Resilient (falling less than total)

Key takeaways

- Major revenue contributors that are trending upwards (gaining share and selling more units): blazers (+42% units), leggings/tights, cardigans.
- The big volume lines (dresses, trousers, tops) are resilient: sales are falling, but less than H&M overall.
- Summer and holiday items fell hardest: shorts, swimwear, sunglasses and sandals dropped about 25–50% in units. This may be linked to less travel in summer 2020 due to COVID.

Notes & limitations

- Trend status is based on units sold, not revenue
- Factors not captured in the data (e.g. promotions, campaigns, price changes) can drive short-term fluctuations that are only a temporary reaction
- More data on company decisions and market context is needed to identify real trending products.
